Subject: Northwest Installations/Industrial Movers

To Whom It May Concern,

I wanted to thank the Industrial Movers team for the professionalism and accuracy of Faster's move in April of 2026. The team on site work hand in hand with myself and other project team members to unload and place seven light assembly lines and two end of line Hydraulic Testers within a single day. The time management and methods of moving this equipment allowed Faster Inc. to jump back into day to day activities quickly and reduce potential impact to our customers.

In the end, I would recommend the Industrial Movers Team for future work as needed.

Regards,

Tom Fischer/Project Lead and Quality Manager
Faster Inc.
